

PC Carbine™ Drop-In Mag Release Installation Instructions

Check our website at jawbonetactical.com for more info and installation videos.

For Glock Magwell

1. Ensure that the rifle is unloaded.
2. Loosen magazine release button screw carefully so that spring doesn't fly out.
3. Set the spring, button, and screw aside.
4. Push the original magazine release through and pull it out the other side.
5. Insert Jawbone Drop-In Mag Release.
6. Insert magazine release spring onto threaded rod. You can use the original Ruger® Spring but we recommend using our stiffer spring (included with our mag release).
7. Carefully put the button and screw over spring and thread screw into threaded rod, ensuring that the button is lined up with the hole in the receiver.
8. Test for normal function.
9. Insert an empty magazine and make sure it locks in place and drops free when the lever is depressed.
10. Throw it in the truck and get your ass to the range.

For Ruger® Magwell

1. Ensure that the rifle is unloaded.
2. Loosen magazine release button screw carefully so that spring doesn't fly out.
3. Set the spring, button, and screw aside.
4. Using your finger inside the magwell, compress the magazine latch (See Picture).
5. Push the original magazine release through and pull it out the other side.
6. While still compressing the magazine latch inside the magwell, insert Jawbone Drop-In Mag Release.
7. Insert magazine release spring onto threaded rod. You can use the original Ruger® Spring but we recommend using our stiffer spring (included with our mag release).
8. Carefully put the button and screw over spring and thread screw into threaded rod, ensuring that the button is lined up with the hole in the receiver.
9. Test for normal function.
10. Insert an empty magazine and make sure it locks in place and drops free when the lever is depressed.
11. Throw it in the truck and get your ass to the range.
